HOW ONE ID GLOBAL AUTOPOOL WORKS ?

Global One Line Autopool :

Globally One Id & line (Single-line) structure.

Every new user will be placed under previous joined user according to Autopool Entry amount transaction 'Timestamp.'

§ **Entry :** Autopool 1 Entry amount is 1 ETH. User Pays Entry amount to previously joined user and recorded on Ethereum Blockchain

▪ **Timestamp :** It is recorded by the Ethereum Blockchain that gives the received time of the respective transactions.

▪ **One Line :** Every new user pays entry amount to previous joined user 100% from user's wallet to user's wallet. (Peer to peer)

▪ **Real Global Autopool :** One line Autopool structure is irrespective to referral line or sponsors line. Hence this is real One line Global Autopool system gives opportunity to earn passive income by global growth of Unstoppable 'BullRun'

▪ **Pool Entry and Profit Protocols :** Autopool 1 to 10 entry protocols are deployed and written on smart contract code.

✓ *Every New user can start from any Autopool 1 to Autopool 10*

✓ *Autopool is single line structure is based on first enter first get paid protocol.*

✓ *To enter Autopool 1 : No Direct Referral necessary*

ü **From Autopool 2 to 10 Every Autopool no need Direct Referral to eligible for Autopool entry.**

✓ **Profit :** Every user get paid by newly joined users globally.
